

2 in 1 Jacket/Tote transformation instructions

1. Zip the jacket closed and lay it flat with the back up (facing you) and fold the arms in across the back.
2. Unzip the zipper that runs across the back of the jacket.
3. Reach into the pouch and pull out the handles.
4. Pull out the 3 snap tabs on both the top and bottom of the inside of the pouch to begin pulling the lining out. This will start the jacket moving into the bag.
5. Continue to tuck the jacket into the bag, until it all fits. The 3 snaps that run across the bottom on each side of the bag will be visible on the outside.
6. Turn the bag over, zipper down. Fold the bag in half lengthwise and snap the snaps together. (opposite sides)
7. Pull on the handles slightly to adjust the bag.
8. You now have a "folded bag" with 2 sides to use!
